QUALITY AND COMPLIANCE MONITORING MANAGEMENT

(FLY Course code: 016-C)

Issue of 19.09.2017

Introduction

Quality can be just about auditing for compliance, but taking a systems approach to quality assurance releases maximum value from your organization's processes. Learn how to identify under-performing processes and systemic failures and unlock the potential for system improvements and reduce exposure to corporate risk. This philosophy is described in the EASA regulations, which require continuous improvement of the Compliance Monitoring program.
